History

NEWARK, county seat of Essex County and largest city of New Jersey (1940 Census 429,760) situated on Passaic River and Newark Bay, an arm of New York Bay, 8 miles west of New York, has 13 miles of water front, is a port of entry with deep-water harbor and river facilities. Lighterage service connects with New York Harbor lines providing water, or rail and water facilities to all principal points. Area of city 23.6 square miles containing 357 miles of paved streets and 393 miles of sewers. Served by 5 trunk line railroads: Pennsylvania; Erie; Lackawanna; Lehigh Valley and Central Railroad of New Jersey; also near-by connection with Baltimore and Ohio. Pennsylvania and Lackawanna are electrically operated through the city. Hudson and Manhattan Railway (the Tubes) operating from Pennsylvania station, maintains day and night service between New York and Newark carrying about 75,000,000 passengers annually. Street passenger transportation by means of motor buses driven by gas or electricity is augmented by City Railway (high-speed electric trolley subway, constructed by the City in bed of the Old Morris Canal, operated by Public Service Corporation) extending from Pennsylvania station to suburban districts.

Newark is unique by reason of the number of inventive geniuses who were closely associated with its industrial development during their most productive periods. Such men as Seth Boyden (patent leather, malleable cast iron), John Wesley Hyatt (celluloid, roller bearings), Rev. Hannibal Goodwin (flexible film), Thomas A. Edison (electric storage battery, incandescent lamp, etc.), Edward Weston (electrical measuring instruments, generators, etc.), were outstanding individuals among scores of others whose inventions have changed the course of civilization and made American industry the world's leader. United States Patent Office records showed, some years ago, that Newark had contributed more useful inventions to industrial progress than any other American City.

A notable feature of Newark's industrial activity is the wide diversity of manufactured articles produced in large volume. Among the chief of these, as of 1939 are: Food products ($96,235,870) chemicals and allied products including paints, varnishes, drugs, cosmetics ($73,241,763) non-ferrous metals and their products ($48,349,148) electrical machinery ($42,136,326) iron and steel, except machinery ($25,930,933) wearing apparel ($24,300,434) textiles ($17,763,906) machinery, non-electrical ($17,238,101) printing and publishing, etc. ($15,262,341) leather, etc. ($14,580,765) furniture and finished lumber ($6,289,853), paper

products ($6,114,806). Upwards of 50 distinct lines of manufacture have each an annual output valued in excess of $1,000,000. Many of these articles are the product of local genius and the city remains the sole, or principal center of production. The volume and diversity of local industry and commerce has a direct bearing on the labor situation assuring consistently favorable employment conditions.

Though 18th in population, Newark, in the 1939 Census of Manufacturers, ranked 12th among the 18 largest cities of the United States in number of industrial wage earners (56,597) 11th in amount of industrial wages paid ($69,071,962) and 12th in total value of manufactured products ($426,162,505). In industrial production on the basis of comparative city area, Newark outranked all of the 18 largest cities in the United States. It is the center of one of the nation's most intensively developed industrial, commercial or financial areas.

Newark is also an important center for wholesale trade, in 1939 there were 1,006 establishments, with 13,000 employees, pay rolls of $24,328,000 and sales valued at $397,832,000. Newark is New Jersey's principal retail trade center, its metropolitan department stores have nation-wide reputations. In retail sales, in proportion to population, it outranked New York, Chicago, and Philadelphia according to the Federal Retail census of 1939. In that year 7,986 stores had 25,454 employees, payrolls of $35,673,000 and sales of $249,372,000.

The city is one of the nation's leading warehousing and distributing centers, keeping pace with the demands of scientific production and distribution. Because of the exceptional transportation facilities in the Newark area and its nearness to rich markets, many of the country's leading manufacturers store and distribute their goods from this point.

The city is the focal point of a comprehensive system of modern state and national highways, making for rapid and economical transportation between it and all large eastern centers. Several of its trunk highways are marvels of modern super-construction. The Lincoln Highway, on which is the Pulaski Skyway, passes over high-level bridges across the Hackensack meadows, the Passaic and Hackensack Rivers, then through the Holland and Lincoln Tunnels under the Hudson River, and makes motor car travel a matter of minutes only to or from Manhattan.

Port Newark, redeemed from the marsh lands along the shores of Newark Bay and the Passaic River, has achieved an important position in coastwise and foreign water-borne trade prior to the outbreak of the War.

The water supply of Newark is derived from municipally owned reservations located in mountainous districts distant from the city covering an area of 158 square miles. The reservoirs have a combined storage capacity of about forty billion gallons.

Newark has an extensive system of parks, many of them located near the heart of the City. Military Park and Washington Park have historical interest as they were set apart in the early days of the settlement. Within the City limits, too, are Branch Brook, (277 acres) and Weequahic (323 acres) units of the Essex County Park system. Many notable monuments adorn the various parks, among them an equestrian statue of Washington; Wars of America by Gutzon Borglum; the famous seated Lincoln in County Court House Plaza; and statues of Seth Boyden, Frederick F. Frelinghuysen, General Philip Kearny, Abraham Coles, and Columbus.

Among Newark's notable buildings are the City Hall, County Court House, Hall of Records, Public Library, New Jersey Historical Society, Museum, Federal Building, the massive Prudential Group, Mutual Benefit Life, American Life, Public Service of N. J., N. J. Bell Telephone, National Newark and Essex Bank, Raymond-Commerce, Federal Trust, and the Pennsylvania Railroad station, the majority of them designed by local architects. Hos-

pitals include: Presbyterian, St. Michaels, St. Barnabas, Beth Israel, City, St. James, Newark Memorial, Eye and Ear Infirmary, Hospital and Home for Crippled Children and Community Hospital. Religions of every demonination are represented in the city and many of the Churches possess great architectural distinction. St. Patrick's and Trinity are respectively the Roman Catholic and Protestant Episcopal Cathedrals. "Old First" (Presbyterian) has been a landmark since the earliest days of the settlement. Upwards of 40 Hotels afford ample accommodation for family and transient business. Cultural, professional and social activities are promoted through a wide variety of clubs and associations.

Educational institutions include: Newark Colleges of Rutgers University, Newark College of Engineering, State Normal School and the Academy of Medicine of Northern New Jersey. The Public School System covers regulation Senior and Junior High, Elementary Schools, School of Fine and Industrial Art, also special schools and classes for the physically handicapped. Newark Public School Stadium, seating capacity about 14,000 is utilized by the Board of Education for part of course of study in physical instruction. There is also an extensive system of Parochial Schools. About 50 theatres, including units of the large circuits, supply entertainment to devotees of the motion pictures. Local newspapers are: Star-Ledger (morning) daily and Sunday; Evening News daily except Sunday; Call, Sunday.

The Commission form of government was approved in Newark by referendum vote October 9, 1916 to succeed the aldermanic system. Election for the first Board of City Commissioners was held November 13, 1917. Five Commissioners are elected for four years and select the Mayor from among their own members.

Newark is the financial metropolis of New Jersey. It contains the oldest chartered bank and the largest fiduciary institution in the State. Newark Clearing House Association was organized in 1922. Newark is also one of the foremost insurance centers in the United States. It was the birthplace of companies in life, fire and casualty insurance field which pioneered in scientific insurance, whose business is today of world-wide scope.

The Chamber of Commerce of the City of Newark was organized in 1868 and celebrated its seventy-fifth anniversary in 1943; it occupies its own building erected in 1923.

Newark was settled in 1666 by a band of Puritan pioneers from the New Haven Colony at Milford, Connecticut, led by Captain Robert Treat. It was incorporated as a city in 1836 and was received by charter from the Legislature in 1857. The first settlers were interested wholly in agriculture, but, from the earliest days skilled craftsmen from the Old World, bringing the tools of their trades, were attracted to the young community. These artisans were an important factor in determining Newark's future industrial trend as they developed a manufacturing nucleus while the nation was still in its swaddling clothes, and laid the foundations of Newark's reputation as an important industrial center. The City's position in this respect was firmly established by the middle of the 19th century, its progress since then, in volume and variety of manufactured products has been uninterrupted.

"What You Should Know About Your City"

"The helpful kind of patriotism is the kind that grows out of a knowledge of one's town, of her growth, her people, her property, her government and her needs. This knowledge develops, first, an intelligent interest; then, a sympathy; then a reasonable affection; a wise and temperate jealously for her good name and a wish that she may prosper and grow beautiful; and, finally, a desire to help her to become greater and finer, a bright and clean workshop and a home for the best of men and women."
—John Cotton Dana.

"Organized Effort on Behalf of Our City"

"The conception of Chamber activities is embodied in one of the adopted slogans—'Organized Effort on Behalf of Our City'—and the Chamber is a success only to the degree that this effort is extended and service rendered impartially, fearlessly, and unselfishly for the benefit of the community. The Chamber has made great strides in further developing the comprehensive character of the organization, which today is more generally recognized as an organized body through which all citizens may work for the advancement of the civic and commercial welfare of the city. It is non-political and non-sectarian. It voices the opinion of a membership composed of all shades of thought and of all lines of commercial and professional activity. It is the voluntary, collective contribution of public-spirited men and women to the common good."

THE DISTRICT COURT of the ESSEX COUNTY JUDICIAL DISTRICT

By the passage of Chapters 278 and 279, Laws of 1945, the two Newark District Courts, together with the District Courts at Irvington, Montclair, East Orange and Orange, were abolished and The District Court of the Essex County Judicial District was established.
The new court's territorial jurisdiction is co-extensive with the limits of Essex County. The other jurisdiction is the same as the old courts, that is, over every action of a civil nature at law, or to recover any penalty imposed or authorized by any law of this state, where the debt, balance, penalty, damage or other matter in dispute does not exceed, exclusive of costs, the sum or value of $500.00. The court also has jurisdiction in proceedings between landlords and tenants and in actions of forcible entry and detainer, and in actions of replevin where the value of the goods or chattels of which replevin is sought does not exceed the value of $500.00, and in attachment for a sum not exceeding $500.00.
The new court has a President Judge and three other judges and it sits in four different parts of the county. Central Office, Part I, is located in the City Hall Annex, Newark, N. J.; Part II, at 1068 Clinton Avenue, Irvington, N. J.; Part III, at 6 South Fullerton Avenue, Montclair, N. J., and Part IV, at 61 North Munn Avenue, East Orange, N. J.
The President Judge is Cecil H. MacMahon. The other Judges are F. D. Masucci, Henry W. Trimble and Joseph G. Lyons. The Clerk of the Court is Louis Hecht, who operates from Central Office, Part I. The President Judge assigns the other Judges to preside over and hold each Part of such court and rotates them from time to time. The President Judge also assigns the cases to the various Parts.
The court is open from 9:00 A.M. to 4:30 P.M.
The salaries of the Judges at present are as follows: President Judge $8,500.00; each of the other Judges $8,000.00.
All fees are paid into the County Treasury, the Judges and Clerk receiving no part of them. The Judges each hold office for five years.

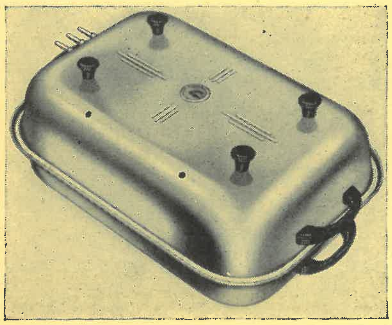
Newark Appliance Corp., Inc.

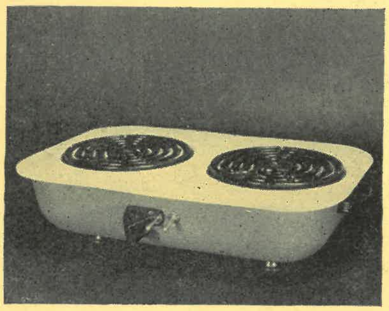
Manufacturers of PRINCESS LINE of Electrical Appliances

THE PRINCESS ELECTRIC BROILER



The Newark Appliance Corporation now offers to the public the country's newest and most modern electric broiler *"The Princess." The Princess* broiler is especially designed for beauty, smartness, and utility. The shape and size of the broiler permits the cooking of steaks, roasts, small fowl and many other foods without distortion, trimming, special preparation or waste. It is engineered scientifically for the maximum efficiency and economy and constructed of carefully selected and tested materials. It is finished in a high chrome polish for lasting beauty.

THE SUPERIOR TABLE STOVE



Superior Because

- It is America's first truly portable hot plate equipped with tray-type heat resistant plastic handles.
- It is designed with simplicity and beauty. Its gentle flowing lines and color scheme give it an instant appeal that cannot be resisted.
- It is engineered with the minimum of moving parts or mechanism, a simple manipulation of the plug instantly gives one or both heat units for use.
- It can be used with either AC or DC current.
- It gives you a selection of 400, 660, or 750 watt heats.
- It has all asbestos internal wiring.
- It has a one piece steel shell which gives it a sturdiness far beyond its requirements—it will not sway or wobble with use.

The Newark Appliance Corporation Inc. also manufactures The Princess Electro-Magic, a complete cooking unit that grills, fries and toasts and The Princess Gem Waffle Iron, an item of distinctive sparkling beauty.

CLASSIFIED DIRECTORY

ITS PRACTICAL USE IS TO GIVE

Information—as to any firm or individual in business, classified according to their business or profession.

Information—as to Associations, Clubs and Societies, when and where they meet and the name and address of their secretary.

Information—as to Churches, their location and pastor together with the pastor's address.

Information—as to where to obtain a list of prospects for your products or service.

Information—as to where to obtain any service that your community has to give.

Information—as to where to buy advantageously when competitive bids are required for any given service or product.

—Finally—

If your neighbor has it to sell, give him your business.

Like consideration from your neighbor adds prosperity to both.

THE MOST MODERN MATTRESS OF THE DAY

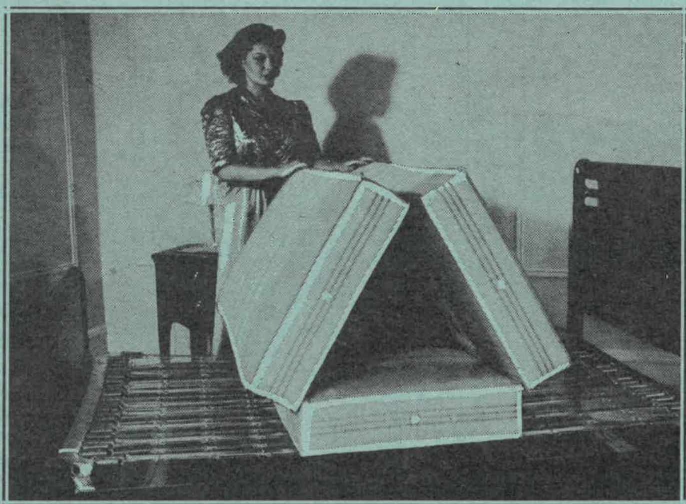
ZIP . . . AND IT'S OPEN
Position of sections changed by the pull of a zipper

The New 20th Century Interchangeable Innerspring 3-Section Zipper Mattress

A blessing to the modern housewife in the ease of cleaning, handling and turning of the mattress. It's easy to rearrange sections, there is no heavy lifting or straining. It is only necessary to turn ⅓ of the mattress at a time, zip the changed sections together and you are again ready for complete sleeping comfort.

CHECK THESE FEATURES

- Three sections for interchanging.
- Position of sections changed. Wears three times longer than a one- iece mattress.
- 8 ounce seamless covering.
- Inner spring construction of Heavy Spring Wire.
- Dustproof border edges plus air ventilators.
- Thick layers of felt padding over spring construction.
- No straining—easy to handle.



EASY TO AIR . . . CLEAN
Mattress gets proper ventilation

- Tuftless surface.
- Quilted Pad arrangement to protect and preserve mattress.
- Strongest and heaviest Zippers used throughout.
- Individual Mattress to fit your weight.
- So well tailored, it defies criticism.
- Truly the last word in bedding comfort.
- By shifting sections once a month, every part of the mattress gets the same uniform wear.

Reference Advertising

He who buys space in the City Directory buys advertising permanency. Every day thousands of business men all over the country search its classified sections to find where nationally advertised goods may be purchased. City Directory ("Reference") Advertising is the completing girder in the bridge between dealer and consumer and should be part of all national and local campaigns.
